Subject: follow up from yesterday

Roger,

Thanks again for meeting us and taking us on a tour of the site – we very much appreciate your time and that of your client. Following up on our discussion, we are requesting the following information:

- Information about the property's boundaries in electronic format, e.g. GIS or CAD files.
- Historical aerial or ground photographs of the Redwood City Saltworks not previously shared with the Army Corps of Engineers or EPA. Similarly, any historical or contemporary written accounts or descriptions of navigation on the former sloughs or existing ponds on the site.
- Documentation of the frequency and amount of past use of San Francisco Bay water from First Slough, such as a description of how and where water is extracted from First Slough, and where and for what purpose(s) the water is used for various processes at the Redwood City Saltworks site.
- Seasonal water quality measurements of the Redwood City Saltworks ponds, especially salinity measurements from 2005 to the present.
- Precipitation data for the site since 2005.
- Elevation data of the ponds and levees subsequent to those provided in *Exhibit 3: Elevations of Crystallizer Beds, Bittern Ponds, and Pickle Ponds at Redwood City Salt Plant*, dated January 17, 2012, and any other site elevation data not previously shared with the Army Corps of Engineers.

Based on our discussion, we understand that you may not have some of this information, but we would appreciate receiving whatever you can provide. If you have any questions about the foregoing, please do not hesitate to ask Jessica. I will be in touch when I return from vacation.

Thanks,
Sylvia
